

ULFX6000 range - UL intelligent addressable control panels

The Eaton ULFX6000 is a high specification intelligent addressable, wall or rack mounted, UL Listed control panel available in various loop configurations. It combines sophisticated functionality with simple operation and aesthetically pleasing design.

The control panel has the ability to support complex cause and effect programming (via site installer) and a wide range of user controllable functions that make the panel ideal for a diverse range of projects from industrial applications through to large multi site commercial developments.

The ULFX6000 uses soft addressing to minimise installation time and remove the potential for error associated with manual addressing. It can operate as a stand alone panel or as part of a networked system, and has powerful programming options that allow configurable control over whether messages from specific panels are transmitted around the network or remain local.

Features and benefits

- Large versatile touch-screen user interface
- 2 or 4 Class A Style 7 SLC loops
- Event history buffer (9,999 events) with date/time stamp
- 4 Notification appliance circuit (NAC's) outputs
- Dedicated alarm, trouble, AC trouble relays
- Integral short circuit isolators
- Up to 200 addresses per loop
- Full network capability up to 126 panels
- Supports a comprehensive range of soft addressing modules and devices for greater flexibility in design
- Menu driven graphical user interface for ease of operation
- Reduced commissioning time through soft addressing and auto learn functions
- Programming and trouble shooting time minimised by using a range of features such as auto config, walk test, system details menus

UL Addressable fire products

ULFX6000 range

Technical specification

Code	ULFX6000 / ULFX6000RM
Description	UL intelligent addressable control panel
Standards	UL864 9th edition
Primary operating supply	120V ac / 240V ac, 60Hz, 2.0A supervised
Secondary operating supply	
Battery voltage	24V dc
Battery charge current	1.0A (max)
Battery derating factor	0.1
Battery capacity supervised	12Ah (max)
Notification appliance circuits Class B, Style Y, Sounder Group 1, Sounder 1, Sounder Group 1, Sounder 2, Sounder Group 2	
Output voltage	24V dc
Output current	0.75A (max)
Line impedance	50Ω When powered by 240V ac, the maximum current of 3.0A is shared between these circuits When powered by 120V ac, the maximum current of 2.25A is shared between these circuits Circuits are supervised, power limited and regulated.
Notification appliance circuits Class B, Style Y, SYNC MODULE. NAC1, NAC2	
Output voltage	24V dc
Output current	0.5A (max)
Line impedance	50Ω (max) The maximum current of 0.5A is shared between these circuits Circuits are supervised, power limited and regulated.
Alarm, trouble contacts. Relay expansion	
Unity power factor	30V dc For connection to power limited sources only
Aux relay (AC Trouble) contacts	
Unity power factor	30V dc, 1A For connection to power limited sources only
Signaling line circuit Style [7] Class [A] – (Addressable Loop)	
Rated voltage	24V dc
Maximum current	500mA
Line impedance	50Ω (max) Supervised, power limited
Network SLC	
Voltage	5V dc
Current	100mA (max)
Line impedance	50Ω (max) Power limited Limited to same enclosure installations
Physical	
IP Rating	IP30
Compatibility	
Suitable for use with	Eaton UL fire systems

Intelligent addressable sensor

Left to right: Photoelectric smoke sensor, opto-heat sensor, heat sensor

Our UL range has multiple options for intelligent addressable sensors. All sensors are designed for optimum functionality in mid-large sized builds. They are all soft addressed and have integral short circuit isolators.

All UL addressable sensors are specifically designed for compatibility with the UL addressable sensor base (UCAB300).

Details of the three sensors are included over the page.

Features and benefits

- Built-in short circuit isolators
- Stylish low profile design
- 360° viewable LED design
- Removable detector chamber
- Drift compensation
- Plug and play, no hard addressing required
- 'Clean me' feature means sensor can be cleaned on site using the Eaton manual cleaning procedure
- The programmable heat sensor reduces the number of parts required in the system

Optical smoke sensor (ULCAP320)

Suitable for most applications. Fastest response to slow burning or smouldering fires which give rise to large visible smoke particles.

Opto-heat sensor (ULCAPT340)

Responds quickly to fast clean burning fires. Maintains the advantage of optical sensors when detecting smouldering fires. The thermal enhancement of this sensor allows a higher alarm threshold, providing greater rejection of false alarms. The sensor will also give an alarm at temperatures above 135°F.

For opto-heat and photoelectric operation the sensor automatically compensates for gradual increase in the scatter signal due to contamination e.g. dust build up.

Heat sensor (ULCAH330)

Rate of rise with fixed heat sensor settings will detect a rapid increase in temperature or temperatures above 135°F, and should be used in environments where the ambient conditions might cause false alarms if smoke detection were to be used, for example where there is a high level of dust, fumes, steam or smoke under normal conditions.

Fixed heat sensor settings will detect temperatures above 135°F or 194°F and should be used in environments where the ambient conditions might cause false alarms if smoke detection were to be used, for example where there is a high level of dust, fumes, steam or smoke under normal conditions.

MBG813/817

Eaton callpoints

Two versions of intelligent addressable callpoints are available in this range, the (MBG813) which can be either surface or flush mounted and the (MBG817) which is a weatherproof version.

Both the (MBG813) and the (MBG817) are compatible with the Eaton range of intelligent addressable fire systems.

These intelligent addressable callpoints are attractively designed, simple to install and are supplied as standard with a frangible glass element and a test key for ease of maintenance.

A comprehensive range of accessories are available to maximise the functionality of the callpoint for particular applications.

Features

- Soft addressed
- Integral short circuit isolator
- Single address
- Fast fit clip on front cover
- High visibility status LED
- Wide range of accessories
- Heavy duty terminals
- Two models available:
 - Internal
 - Weatherproof

Benefits

- Quick and simple to install
- Single tool for test and access
- Robust construction
- IP65 version available
- Easy to maintain/service

Technical Specification

Compatibility		
Suitable for use with	Eaton Intelligent Addressable Fire Systems	Eaton Intelligent Addressable Fire Systems

Installation

1. Surface callpoint has standard rear BESA fixing facilities. In addition, back box can accept top or bottom surface entry cables. Surface callpoint can also be flush mounted.
2. Callpoint has test facility via special test key to prevent unauthorised operation.
3. Insertion of test key for test purposes and for cover removal is at bottom of callpoint to facilitate ease of access when mounted next to door architrave.
4. Test key is dual function, used to test callpoint operation by simulating activation and also to allow removal of clip on cover to gain access to element.
5. Element is held in place by clip on self locking cover which can only be removed by use of a special tool (callpoint test key).
6. Separate loop in and loop out terminals are provided for all connections including screen continuity on intelligent addressable callpoints.
7. Surface/flush callpoints are IP42, weatherproof is IP65.

Standard Connections

WARNING:

Do NOT use high voltage testers if ANY equipment is connected to the system.

Screen (Earth) must be continuous along entire length of loop.

Dimensions

Description	H (mm)	W (mm)	D (mm)
Flush Mounted	87	87	36
Surface Mounted	87	87	57
Weatherproof	87	87	59

User Interface

1. To enable quick and simple installation, callpoints use a fast fit self locking clip on front cover which is very simple to fit, but once in place, can only be removed by use of a special key (supplied).
2. Callpoint is triggered by pressing against the element.

ULMCIM - UL micro single channel input unit

An extensive range of interfaces are available to support the Eaton range of UL intelligent addressable control panels, providing solutions for most design requirements.

The UL micro single channel input unit (ULMCIM) is a single input, soft addressed micro interface, incorporating integral short circuit isolators. It is extremely compact and therefore ideal for incorporation into other equipment.

It is designed for applications requiring the monitoring of a set of normally open, volt free contacts such as sprinkler system flow switches, auxiliary panel fire/fault signals as well as non fire input signals such as flow valve open contacts, generator start up, fire door closed etc.

Features and benefits

- Soft addressed
- Integral short circuit isolator
- Single address
- Suitable for monitoring:
flow switches / non fire inputs / auxillary panels
- Optional variant: ULMCIM-C
- Quick and simple to install
- No hard addressing required (plug and play)
- Compact size

Optional variant

The ULMCIM-C is designed for use with Eaton's pull stations and is identified by the panel as a pull station. Therefore, up to 200 can be connected to the loop (ULMCIM maximum is 200 per loop).

Technical specification

Code	ULMCIM / ULMCIM-C
Description	Single channel input units
Standards	UL864 9th edition
Signalling line circuit (Style 7, Class A, Supervised, Power Limited)	
Current	332µA
Operating voltage	24V dc
Input (Initiating Circuit Class B, Style C, Supervised, Power Limited)	
Voltage	8.4Vpp (pulsed every 1 sec)
Current 1	.2mA
Trigger resistance	5.6kΩ
End of line resistor	22kΩ
Line impedance 1	6 (max)
Environmental	
Operating temperature	0°C to 49°C
Humidity (non condensing)	0 to 93 %RH
Physical	
Dimensions (H x W x D)	65mm x 35mm x 18.5mm
Weight	0.05kg
Ingress protection	IP40
Compatibility	
Suitable for use with	Eaton UL fire systems

Notes:

No addressing of the interface is required (see control panel operation for details).
ULMCIM-C needs to be programmed as a pull station on site installer software.

Mounting details (back box)

Installation

1. Fit the unit in position in accordance to the mounting details.
2. Connect the unit according to standard connections.
3. Up to 3 units can be fitted inside a micro module box unit.

Operation

Normal Standby / Alarm / NAC Silence / Alarm Reset / Trouble / Supervisory / Drill

Dimensions

H (mm)	W (mm)	D (mm)
65	35	18.5

Standard connections

Notes:

1. The end of line resistor provided must always be fitted, even if the input is unused.
2. Monitored inputs can detect open or short circuit faults.
3. Recommended loop cable type: FIRETUF, FP200, MICC.

Description	SLC field wiring (input)	Single channel input

ULMCOM - UL micro single channel output unit

An extensive range of interfaces are available to support the Eaton range of UL intelligent addressable control panels, providing solutions for most design requirements.

The UL single channel output unit (ULMCOM) is an extremely compact unit ideal for incorporation in to external equipment and suitable for switching low voltages (24V dc at 1A maximum).

This unit incorporates a set of non latching relay contacts and is suitable for switching HVAC control circuits, plant shutdown control circuits, fire door closure etc.

The ULMCOM is identified by the panel as an input / output unit, with a maximum of 20 units permitted per loop.

Features and benefits

- Soft addressed
- Integral short circuit isolator
- Single address
- Non latching changeover relay contacts
- Suitable for switching low volts control gear
- Optional variant: ULMCOM-S
- Quick and simple to install
- No hard addressing required (plug and play)
- Compact size

Optional variant

The ULMCOM-S is identified by the panel as a sounder, that resets on both silence and panel reset. The maximum number of ULMCOM-S units per loop is 60, and is counted towards the total number of sounders on the loop.

Technical specification

Code	ULMCOM and ULMCOM-S
Description	Single channel output units
Standards	UL864 9th edition
Signalling line circuit (Style 7, Class A, Supervised, Power Limited)	
Current	0.322mA (max)
Output relay (supervisory programmable)	
Switching voltage	24V dc to 30V dc
Contact rating	1A Resistive, pf=1 (max)
Max line impedance	16Ω
Power factor	1
Environmental	
Operating temperature	0°C to 49°C
Humidity (non condensing)	0 to 93 %RH
Physical	
Dimensions (H x W x D)	65mm x 35mm x 18.5mm
Weight	0.05kg
Ingress protection	IP40
Compatibility	
Suitable for use with	Eaton UL fire systems

Notes:

No addressing of the interface is required (see control panel operation for details).

Mounting details (back box)

Installation

1. Fit the unit in position in accordance to the mounting details.
2. Connect the unit according to standard connections.
3. Up to 3 units can be fitted inside a micro module box unit.
