## G8NB Reflective Optical Beam Smoke

### Detection

### G8NB-50m

### G8NB-100m

#### G8NB Benefits

- Early Detection** - designed to rapidly detect smoke, providing an early warning of a potential fire
- Wide Coverage** - suitable for spaces with high ceilings or expansive open areas where traditional point detectors may not be as effective
- Reduced False Alarms** - reliable and effective fire detection solution
- Ease of Installation** - simpler and more cost effective than deploying a large number of point detectors to cover the same area
- Adaptable** - configurable threshold levels to the installation environment
- Reduced Maintenance** - lower overall costs and less disruption to building operations
